

# CDC AROUND THE WORLD:

## OUTBREAKS MEET THEIR MATCH WHEN DISEASE DETECTIVES ARE ON THE SCENE

CDC trains disease detectives to provide faster, smarter response to outbreaks. With program engagement in over 70 countries, CDC supports the development of Field Epidemiology Training Programs (FETP) around the world. These programs build a skilled workforce of disease detectives who can find and stop outbreaks at the source, before they spread globally.

### ● AFGHANISTAN

Measles Outbreak

Conducted a rapid survey to check vaccination status

### ● AMERICAN SAMOA

Lymphatic Filariasis

Tested schoolchildren to determine transmission levels

### ● BANGLADESH

Acute Encephalitis Outbreak

Investigated suspected pesticide poisoning

### ● CHINA

*Staphylococcus aureus* Outbreak

Investigated and traced the cause of outbreak

### ● COLOMBIA

Infant Diarrheal Deaths

Investigated deaths in infants due to diarrheal disease

### ● HAITI

Hurricane Matthew Response

Conducted rapid needs assessment for relief support

### ● NIGERIA

Pertussis Outbreak

Collected data about the outbreak and taught caregivers

### ● PHILIPPINES

Cholera Outbreak

Taught mothers prevention methods to combat disease spread

### ● TANZANIA

Cholera Outbreak

Collected samples from a contaminated water source

### ● YEMEN

Dengue Fever Outbreak

Discovered the source of dengue fever, tracked cases and applied control measures

### ● ZIMBABWE

Neonatal Sepsis

Collected swabs to investigate the cause of a sudden increase in sepsis
